

dB Acoustics Pty Ltd

ABN 71 121 370 894

# Audio Rooms

OH&S now consider hearing tests invaluable to monitor and reduce the amount of injuries to the human ear when working in a noisy environment. Site testing can be carried out by using a transportable or fixed dB Acoustics Audio room. By testing an employee's hearing loss prior to commencement a company can reduce their liability from the penalties of Worker's compensation Claims.

dB Acoustics have a standard size of Audio rooms but we can customize a unit to meet your requirements. The size and thickness of the walls are determined by the back ground noise being generated on each specific site and our Noise engineers can determine the best Audio room construction to meet your conditions.

dB Acoustics Audio rooms come with a variety of auxiliary items such as:

- Larger access doors
- Additional windows
- Lighting and power to external junction box
- Isolation mounts and jacking screws
- Floor carpeting or vinyl covering
- Warning lights.
- Internal door panic bars
- Seat

The dB Acoustics Audio Room can be supplied fully assembled and delivered to site or they can be assembled on site by our experienced assembly team.
